EDUCATION

Florida International University (FIU) — Miami, FL

Expected Graduation: Dec 2026

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures & Algorithms, Programming I & II (Java/C), Systems Programming, Computer Architecture, Discrete Mathematics, Database Systems, Web Development, Microcomputers.

</> TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C, SQL, HTML5, CSS3, Bash / Shell Scripting
Web & Frameworks: React, Vite, Node.js, Express, RESTful APIs, Tailwind CSS, Responsive Design, State Management
Datacenter & Systems: Tier-III Datacenter Operations, Server Racking & Cabling (Fiber/Copper), Linux (Ubuntu, CentOS), Windows Server, TCP/IP, DNS/DHCP, PDU Power Loading, High-Availability SLA Uptime
Cloud & Databases: Firebase (Cloud Firestore), AWS (EC2, S3, IAM), Vercel, Supabase, Git / GitHub Version Control
Tools & Specialized: Retell AI Voice Agents, Stripe API, VMware ESXi, VirtualBox, Postman, POS Hardware Diagnostics

TECHNICAL & PROFESSIONAL EXPERIENCE

Northwest Regional Data Center (NWRDC) — IT Operations Tech Support

March 2026 – Present

Enterprise Tier-III Data Center Infrastructure & Systems

- Maintain 24/7 mission-critical operational monitoring, telemetry diagnostics, and tier-1/tier-2 incident response for Florida's premier public data center, upholding **99.99%+ high-availability uptime** for state agencies and universities.
- Execute physical server hardware installations, blade chassis configurations, PDU circuit load balancing, and structured fiber optic / CAT6 copper cable management adhering to strict datacenter compliance.
- Rapidly troubleshoot system alerts, conduct environmental diagnostic sweeps, and coordinate escalation procedures to resolve hardware faults with minimal client service interruption.

Elite Home Health Care Agency — Web Developer & Software Engineer

February 2026 – Present

Healthcare Operations Platform & Web Development (elitehomehealthcare.agency)

- Architected and deployed full-stack agency clinical management platform and patient portal using **React, Vite, and Cloud Firestore**, streamlining daily caregiver dispatch and client billing.
- Engineered Florida AHCA Level 2 regulatory compliance audit engine, automating 1099 caregiver background check tracking, expiration alerts, and secure digital document vault management.
- Developed mobile caregiver Electronic Visit Verification (EVV) system featuring real-time **GPS geolocation check-in/out** and role-based security PIN authentication.
- Integrated **Retell AI 24/7 conversational voice receptionist**, automating caller triage, client intake flows, and real-time transcript logging.

CVS Health — Shift Supervisor & Pharmacy Technician

June 2022 – February 2026

IT Systems Support, Retail Operations & Team Leadership

- Diagnosed and resolved POS hardware terminals, barcode scanners, thermal receipt printers, and store network connectivity issues to prevent transactional downtime.
- Supervised frontline team of 10+ employees; maintained confidential medical databases under strict **HIPAA compliance** processing 100+ patient records daily.

Florida International University — Student IT Support Assistant (Panther's Card)

August 2021 – May 2022

Identity Access Systems & Campus IT Services

- Provided tier-1 technical support for campus smart card access control systems, magnetic stripe encoders, and user authentication accounts for 100+ students and faculty daily.

KEY TECHNICAL PROJECTS

Elite Care Management Platform & AI Receptionist • elitehomehealthcare.agency

2026

Technologies: React, Vite, Firebase Cloud Firestore, Retell AI, Stripe API, Geolocation EVV, Vercel

- Built end-to-end healthcare operations software delivering real-time scheduling, client invoicing with Stripe, AHCA compliance scoring, and an AI conversational voice agent handling phone intake 24/7.

ElevateHaul - Digital Logistics & Freight Platform • github.com/Seb1015/ElevateHaul

2025

Technologies: Full-Stack JavaScript, Node.js, REST APIs, Cloud Deployment

- Engineered on-demand freight and moving logistics platform with automated distance quote calculations, load dispatching workflows, and verified independent driver management.

Hardened Linux Web Server Deployment & AWS S3 • github.com/Seb1015/Linux-Web-Server

2024

Technologies: Linux (Ubuntu Server), Apache/Nginx, AWS S3, Bash Automation, UFW Firewall

- Deployed production Linux web server with automated shell provisioning scripts, secure SSL/TLS certificates, hardened firewall rules, and scalable AWS S3 cloud storage buckets.

HONORS, CERTIFICATIONS & LANGUAGES

FIU Leadership Award • Recognized for excellence in student organization leadership

Credly Software Development Ready • Verified internship technical competency **Bilingual:** English (Native / Fluent) • Spanish (Native / Fluent)
